## May Product Spotlight

**CHLORASCRUB™ TOUCHPOINTS™**

### A simple change can touch many lives...

In a recent peer reviewed publication, the Chlorascrub™ Swabstick (3.15% chlorhexidine gluconate/70% isopropyl alcohol) was used as part of an initiative to reduce central line associated bloodstream infections (CLABSI) in an acute pediatric rehabilitation hospital.<sup>1</sup>

- © Chlorascrub™ Swabstick was used in conjunction with multiple interventions to reduce this facilities CLABSI rate from a range of 8.0-12.7 to 0.3 over a two-year period.<sup>1</sup>
